

Sample Candidate

AI Backend Engineer | sample.candidate@example.com | +383 44 000 000 | Pristina, Kosovo |
linkedin.com/in/sample-candidate

Professional Summary

AI Backend Engineer with 3 years of experience building Python services, deterministic workflow automation, document processing pipelines, and local AI prototypes. Strong background in FastAPI, Pydantic, SQL, LangGraph-style orchestration, and audit-friendly artifact generation.

Core Skills

Python	FastAPI	Pydantic	SQL
LangGraph	LangChain	Streamlit	PyMuPDF
Document extraction	Workflow orchestration	Data validation	Audit logs

Professional Experience

Backend AI Engineer - DemoTech Labs | Jan 2023 - Present | Pristina, Kosovo

- Built local Python workflow services for document intake, validation, and structured artifact output.
- Implemented Pydantic schema validation for candidate, job, and run metadata contracts.
- Created deterministic run folders with JSON, Markdown, and audit event outputs for repeatable demos.

Junior Python Developer - DataOps Studio | Jun 2021 - Dec 2022 | Remote

- Developed data cleaning scripts, PDF text extraction utilities, and SQL reporting helpers.
- Supported internal Streamlit dashboards for reviewing processed files and quality checks.

Education

B.Sc. Computer Science - Sample University | 2019 - 2022

Certifications

Python Professional Certificate - Sample Training Institute | 2023

AI Workflow Foundations Certificate - Sample Academy | 2024

Projects

Hiring Bundle Intake Workflow - Built a local workflow that validates Hiring Bundles, creates run directories, writes context packets, and preserves audit-ready findings.
